### **Public Health Recommendations**

1. Disposable face masks (typically blue or white) should be used once (8hr period) and thrown away at the end of the day.
2. Reusable masks should be worn for one day and then washed following manufacturer instructions or [CDC guidance](#).
3. If a mask becomes dirty or damaged, replace the mask with a clean mask.
4. Do not share your used mask, reusable or disposable, with others.
5. Store your face mask in a clean paper or zip-lock bag when not in use. Do not place it in your purse, backpack, or other area where it may come in contact with other personal items. If you have no bag, you may fold the mask in half so that the outside is touching itself and place somewhere away from other items until you are ready to use again.
